

Sunbrella

Gazebo Structure

Fabric roofed gazebo structures have become a widely accepted, attractive and aesthetically accepted alternative to traditional solutions. Fabric roofs provide protection against the harshest UV rays, animal vandalism, bird droppings and tree shedding. Weather proof membranes also add protection against dirt, dust and rain, at the same time giving a feeling of openness and lightness. **Best suited for swimming pools and gardens.**

Size: Single span - 6m MAX (can be adjusted)

Specifications:

Paint - Epoxy / Enamel paint of desired shades.

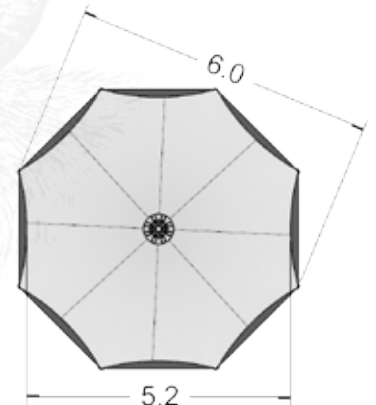

Fabric - 650gsm, Mehler / Ferrari / Sioen as required
Tensile strength - 280/280 daN/50mm strip
Tear strength - 30/28 daN
Weldable Flourinated Varnish, 1100 dtex PES HT.

Steel Details -

Closed Structural hollow sections as per IS 1161. Cables and connections are available in both Mild Steel and Stainless Steel (304 & 316)

Engineering & Warranty -

Engineered to withstand wind loads of 45m/s (160km/hr) and more if required. Warranty of Fabric as applicable.
